

Fifth Open House for an Environmental Assessment of the Capital Region Resource Recovery Centre

Taggart Miller Environmental Services (Taggart Miller) is undertaking an environmental assessment (EA) under the *Ontario Environmental Assessment Act* for a proposed integrated waste management project to be known as the Capital Region Resource Recovery Centre (CRRRC).

The CRRRC, if approved, would provide facilities and capacity for recovery of resources and diversion of materials from disposal that are generated by the Industrial, Commercial and Institutional (IC&I) and Construction and Demolition (C&D) sectors in Ottawa and eastern Ontario, as well as disposal capacity for material that is not diverted. The components of the CRRRC will be developed through further consultation during the environmental assessment and are currently proposed to include:

- material recovery facility;
- construction and demolition waste processing;
- organics processing;
- hydrocarbon contaminated soil treatment;
- surplus soil management;
- a drop off for separated materials or separation of materials;
- leaf and yard materials composting (if there is enough material available); and
- an engineered landfill for residuals disposal.

The location of the CRRRC site is shown on the map below.

The environmental assessment is being carried out according to the approved amended terms of reference. A copy of the approved amended terms of reference is available at the project website: www.CRRRC.ca.

Members of the public, agencies and other interested persons are encouraged to actively participate in the planning of this undertaking by attending consultation opportunities or contacting staff directly with information, comments or questions.

Open House #5 will present the preferred site development concept; the assessment of environmental effects associated with the project together with proposed mitigation measures, monitoring and contingency measures; the results of the leachate treatment, haul route and cumulative impact assessments; an outline of the proposed EA/EPA document package, and an overview of the proposed schedule for submissions and the Ministry decision making process. Participants at this Open House will be informed of the plans regarding distribution of the draft EA for review.

Open House # 5

**Thursday, December 5, 2013
4:00 to 9:00 pm
Carlsbad Springs Community Centre
6020 Piperville Road (Eighth Line), Ottawa**

Public participation by local residents and other interested parties is an important part of the environmental assessment process. In addition to participating in these events, you are invited to submit your comments or be added to our project mailing list via the project website www.CRRRC.ca, by mail, or fax to the address/number provided below.

Mr. Hubert Bourque, Project Manager
Taggart Miller Environmental Services
